Education

University of Massachusetts Boston

Boston, MA

Bachelor of Science, Information Technology, System Administration Track

2022 - 2026

Relevant course work: CS110: Python, CS210: Java: Data Structures and algorithms, CS240: C Programming, IT110: Problem Solving, IT116: Python Scripting, IT244: Linux/Unix, IT 230L: SQL, IT240: Web Fluency, IT246: Networking, IT285: Ethics, IT425: Project Management and IT370: Analytics, IT485: Capstone, ITT461: System design and analysis, 428: Information System Security

Boston University

Boston, MA

Master of Science in Information Systems: Cybersecurity

September 2026

Skills & Interests

Skills: End User/ Client Support, Device Enrollment, Intune enrollment, Ticket Auditing, Distribution list creation, corporate phone setup, Windows Migration, device troubleshooting, Networking

Programming languages: Python, PowerShell, Java, Linux/Unix, C language, HTML/CSS, SQL, Shell Scripting

Computer software/ frameworks: PEMBOK, Active Directory, Microsoft Azure, Microsoft Intune, SAS, Exchange 365, Tableau, 365 Exchange, ServiceDesk+, Windows, Kali Linux, Virtual environments (VMware, VirtualBox, Hyper-V), Active Directory users and computers (ADUC), AGILE Methodology, MS Excel, Wireshark, FactSet, Bloomberg Terminal, S&P Capital IQ, SourceScrub, DealCloud, BlueMatrix, helpdesk, Slack, Google workspace, Slack, IT Helpdesk, Zendesk, Glean, AWS, CRM applications, IGA, Okta, JAMF, NinjaOne

AI: Glean, Claude, ChatGPT, Gemini

Interests: Cybersecurity fundamentals and endpoint protection, system and network administration, cloud computing and modern device management, enterprise IT support operations, data analytics and visualization for operational and security insights, and healthcare IT

Soft Skills: Great Attention to Detail, Responsible, Impact-Driven, Professional, Customer Service

Languages: English, Haitian Creole

Projects

System Administration Projects

2025 - Present

- Installed, configured, and maintained Windows and Linux systems.
- Developed and executed shell scripts for task automation.
- Configured a Local Area Network (LAN) consisting of a central server (Ubuntu Server LTS) on multiple virtual machine clients.
- Built, configured, and managed virtualized Windows and Linux environments using VMware and Hyper-V, including DNS setup, user management, and system maintenance tasks

Programming & Development Projects

- Designed a personal portfolio website using Python, HTML, and CSS, showcasing technical skills and project work.
- Designed and implemented a program for an email signature generator using Python, HTML, JavaScript, CSS, and JSON to standardize company branding across all employee communications.
- Collaborated on the design of a mobile application for UMass Boston's WISER student information system, focusing on usability and system functionality.
- Built and simulated real-world network environments in Cisco Packet Tracer, configuring routers, switches, VLANs, routing protocols, and WAN connections to understand network operation and communication flow.
- Developed and deployed a full-stack e-commerce web platform for custom nail services using Firebase for backend hosting, authentication, and database integration, Stripe for secure payment processing, and HTML, CSS, and JavaScript for a responsive front-end, delivering a polished solution that streamlined service management and enhanced customer engagement.

Experience

EzCater

Boston, MA

IT Service Desk Intern

June 2026 - August 2026

- Provided enterprise IT support through Zendesk, Slack, and in-person assistance, troubleshooting Microsoft 365, Slack, Zoom, Okta, macOS, hardware, software, and collaboration tool issues across the company.
- Configured, deployed, and supported Apple devices by preparing MacBooks, enrolling endpoints into JAMF, assisting with NinjaOne device management, and maintaining accurate endpoint and asset records.
- Supported identity governance and administration through Okta by provisioning application access, handling user permissions, resolving login issues, and assisting with secure onboarding and offboarding processes.
- Contributed to ITSM and service desk process improvements through system evaluation discussions and creating automations to identify documentation gaps and automate knowledge base improvements.
- Worked extensively with Jira workflows and Okta to support workflow automation initiatives, helping improve the efficiency of IT service management processes and employee onboarding.
- Supported remote employee onboarding by assisting with AWS account access and setup, ensuring new hires received the required credentials and access information to connect to cloud-based resources.

Canaccord Genuity LLC

Boston, MA

IT Infrastructure Intern

June 2025 – August 2025

- Provided Tier 1 and Tier 2 Service Desk support across the enterprise environment through ticketing, email, phone, and in-person assistance
- Resolved a wide range of employee IT issues across hardware, software, operating systems, and mobile devices, improving system reliability and minimizing user downtime in a fast-paced enterprise environment
- Enabled secure and efficient onboarding and device management by supporting Active Directory, Azure AD, Microsoft Intune, and Autopilot, ensuring endpoints were properly configured, patched, and protected
- Strengthening organizational security posture by assisting with patch management, malware remediation, incident escalation, and system testing, reducing exposure to vulnerabilities and operational risk
- Improved IT operations efficiency by maintaining accurate inventory, supporting technology deployments and workspace changes, and producing clear technical documentation
- At the company's Global Growth Conference, I was able to assist over 100 users and customers with customer support
